1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5, 6, 7, 14, 29, 30, 32 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Deja D121,112.

As broadly as these claims recite they read on Deja '112, wherein the "struts" are the tubular members between the "outer rungs".

3. Claims 1-6, 8, 10, 12, 19, 20, 22-31, 33, 34 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Hoffman '021.

Note, that the struts(10) of Hoffman '021 provide vertical tension and support to the outer rungs and support arms.

4. Claim 23 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly

point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 23, line 9 "said inner rung portions" has no antecedent, and in line 14 "said outer rung portions" has no antecedent.

5. Claims 9, 13, 15-18 and 21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The patents to Malik, Klein et al., Hoffmire, Tocci, Vidmar et al., and publications to Hu, and Klein et al. are cited to show similar structures.
